Ask Audrey

Dear Audrey,

I got a deficiency in math, and I really don't understand any of it! What do I tell my parents to get them to unground me? I don't even need math in real life!

Sincerely,

Dazed and Confused

Dear Dazed and Confused,

Even if you don't think you'll need math in real life, chances are you probably will. It will end up helping you with your everyday tasks. What you should do since you don't understand math is get after school help from a teacher or upperclassmen. Hope this helps you out!

Love Always,
Audrey
