

**STUDENT INSURANCE--WORK EXPERIENCE STUDENTS**

The Board of Directors strongly recommends that special education students participating in the district's Work Experience Program be covered by a health insurance policy provided by the child's parents.

However, the Maquoketa Valley Community School District will arrange and pay for insurance coverage for the Special Education Work Experience Program which it operates.

Ideally, this insurance will cover the participating employer, the student and the school district for the hours the special education student is participating in a work experience assignment as required by his/her special education Individual Educational Plan.

If feasible, the insurance coverage will include general liability and accident/medical expense provisions.

Special education monies will be utilized for the purchase of this insurance.
