Josie's Jibber

by **Josie Young**

We have had an awesome start to the wildcat school year from the student sections, to all of the accomplishments academically, within extracurriculars and sports, and just the atmosphere overall!

The Wildcat student section has been unbelievable this year, with the themes and everyone cheering as loud as they can. I know when people hear you cheering for them it gets them pumped up, especially in tough game and makes they play harder.

So this year when you attend all of the events that you can to support your fellow cats, make sure you cheer as loud as you can and go all out with your themes!

Now let's make note of everything we have accomplished in the first two weeks of school. The Wildcat community has been known for their accomplishments, but this year it seems different. During the first two weeks of school, already so many things have been accomplished, and so much more will be accomplished with everyone's hard work! Let's keep up all of this hard work through the year, to accomplish so much more through this wildcat year!

Rebekah & Amanda: Nerve: Are you a player or a watcher? Vee Delmonico was an average high schooler and never took any risks. Until the night she decides to play nerve. Nerve is the equivalence of high stakes truth or dare. If you win you make money and if you lose, you lose it all. Vee soon meets Ian and the watchers decide to team them up. Soon the risks begin to get higher and higher and Vee will have to put everything on the line, including her life. This high action movie had us guess until the very end. So do you accept the challenge to go watch Nerve?

Rebekah:
Panic by Lauren Oliver: A thrilling book that constantly has you on the edge of your seat. In a small town everyone had the same goal, find a way to get out. Whether it be to go to college, trying to get away from your parents, or trying to run away from a mistake. The graduating seniors have a chance to do just that with a game called "Panic." The contestants go through a series of challenges, and whoever wins the most, and wins the final Joust, gets the grand prize of cash. Heather and her friends are trapped inside the game, all aiming towards the same goal, but willing to help each other out. I highly recommend this book.

The Fundamentals of Caring: This is by far one of the cutest and funniest movies that I have seen. An adult man becomes a caregiver to a teenage that is barely able to take care of himself. The two become very close and decide to take an adventure together. One this trip they both learn things about themselves, one another, and life in general. Along the way you meet more characters that make this movie a must see.

Young & Hungry: Gabi needs a job in order for her and her roommate to make ends meet. She is a chef, and finds a job quickly as she becomes a personal chef to a rich man named Josh. Everyday she has to prove herself to Josh and the other people that work for him. Gabi goes through some pretty rocky times, but also has some amazing moments and memories. I binged watched one season in about three days. Once you start you will never be able to stop.

Amanda:
The Unbearable Book Club for Unsinkable Girls by Julie Schumacher: Has your mother ever forced you to do something that you absolutely dreaded? After Adrienna Haus is in an accident and injuries her knee her summer plans are ruined or so she thinks. Her mother had other plans and creates a mother-daughter book club. Adrienna soon becomes friends with another member of the club Ceecee and together they go on adventures that will save Adrienna's summer from being the worst. This book is a perfect mixture of literary insight and fun summer memories. This book keeps you on your toes till the very end.

Mono: In this hilarious film we see a classic geeks become popular. After an outburst of mono keeps home most of the popular kids home from Highland Park High, the outcast take matters into their own hands and rise up. And they will do anything to keep their popularity. This movie made me laugh and connect with the characters who were just trying to fit in.

Vampire Diaries: I have been watching this show since the very beginning and if you have yet to jump on the binge wagon and watch this show then you are definitely missing out. Elena Gilbert had a pretty normal life in Mystic Falls until she crosses paths with one, Stefan Salvatore. She gets thrown into a world of vampires, witches, and werewolves. As the show progresses we see their love be tested again and again. And it's also nice that the Salvatore brothers are pretty easy on the eyes.
