

**Maquoketa Valley
High School
Course Catalog
2021-2022**

Maquoketa Valley's Commitment to Empowering All Students for Lifelong Success

(All courses reinforce the importance of our Guidelines for Success)

Guidelines for Success:

Perseverance: Refusing to give up in the face of adversity. No matter how difficult the task.

- Try problem solving before asking for help. Don't give up.
- Have the courage to try, even though you are afraid of failing
- Accept and learn from your mistakes

Respect: Being courteous to others through actions and words, and treating others the way you want to be treated.

- Take pride in yourself
- Thoughtfully look at and listen to others
- Greet others
- Calmly share disagreements
- Use appropriate language
- Accept decisions of those in authority

Motivation: Being eager to act and work appropriately.

- Be productive in the classroom environment
- Attend class regularly and on time
- Be involved in academic and nonacademic activities
- Exhibit body language that displays positive energy

Responsibility: Keeping promises, meeting obligations, and being accountable for your actions.

- Come prepared and complete work on time
- Ask for help when needed
- Communicate with teachers in a timely manner when absent
- Take care of your property as well as the property of others
- Be a team player

Integrity: Using an internal set of ethical values to guide the decision-making process. Keep your word and commitments.

- Be truthful with yourself and others
- Be an upstander and bring out the best in others
- Do the right thing even when no one is looking

Maquoketa Valley Graduation Requirements

Course Descriptions start on page 7

Core Curriculum:	30 credits
Electives:	<u>18 credits</u>
TOTAL:	48 credits

Core Curriculum (30 credits required)

** indicates dual credit course*

English: 8 credits / 8 semesters

Year 1 - Required:

- English I

Year 2 - Required:

- English II
- Speech

Year 3 - Required to choose from:

- American Literature I & II
- English III

Year 4 - Required to choose from:

- Composition I & II *
- College Prep English
- Applied English & Communications

Additional Courses:

- Advanced Speech
- Introduction to Literature *
- Creative Writing I & II

Financial Literacy: 1 credit / 1 semester

- Business Finance or Consumer Math (same content)

Physical Education: 1 credit / 2 semesters

Note: PE is required every semester unless a student meets one of the exemptions. A PE excusal form must be signed by the student and parent to be exempt, and then approved by a school official.

- Physical Education (.5 credit/semester)

Social Studies: 6 credits/ 6 semesters

Year 2 - Required:

- World History

Year 3 - Required:

- U.S. History **OR** AP U.S. History

Year 4 - Required:

- American Government

Additional Courses:

- Social Issues
- 60's America
- Street Law
- Character Development & Leadership

Health: 1 credit / 1 semester

- Health I

Technology: 1 credit / 1 semester

- Graphic Design
- Microsoft Office & Keyboarding*
- Information Computing*
- Ag Drawing I
- Photography
- Emerging Technology Trends*
- Fundamentals of Web Design*
- Programming and Logic*

Core Curriculum (30 credits required)

Science - 6 credits / 6 semesters

Possible Course Sequences:

Year	Minimum Required	1 upper level course	2 upper level courses	3 upper level courses
1	Earth Science	Earth Science	Earth Science	Earth Science
2	Biology	Biology	Biology AND Physical Science	Biology AND Physical Science
3-4	Physical Science	Year 3: Physical Science Year 4: Choose from: <ul style="list-style-type: none"> • Chemistry • AP Physics • Anatomy & Physiology 	<i>Choose one course year 3 & 4:</i> <ul style="list-style-type: none"> • Chemistry • AP Physics • Anatomy & Physiology 	<i>Double-up year 3 or 4, take remaining course other year:</i> <ul style="list-style-type: none"> • Chemistry • AP Physics • Anatomy & Physiology

Math - 6 credits / 6 semesters

** Algebra 1 or its equivalent (Basic Algebra A and B) is required

Possible Course Sequences:

Year	Requires Teacher Recommendation	6-8 credits	8-10 credits	Recommended Sequence for AP Calculus (Students who took Algebra I as 8th Graders)
1	Basic Algebra A **	Algebra I **	Algebra I	Geometry
2	Basic Algebra B **	Geometry	Geometry	Algebra II
3	Choose from: <ul style="list-style-type: none"> • Geometry • Applied Math • No Math 	Algebra II	Algebra II	Choose From: <ul style="list-style-type: none"> • Precalculus • Precalculus & Statistics
4	Choose from: <ul style="list-style-type: none"> • Geometry • Applied Math • Algebra II • No Math 	Choose from: <ul style="list-style-type: none"> • Precalculus • Statistics • Applied Math • No Math 	Choose from: <ul style="list-style-type: none"> • Precalculus • Statistics • Applied Math • Pre-Calculus & Statistics 	Choose From: <ul style="list-style-type: none"> • AP Calculus • AP Calculus & Statistics

Electives (18 credits required)

Students may choose courses from this list of electives or courses they have not already taken from the core course list.

* indicates dual credit course

Agriculture:

- Introduction to Agriculture I 9-12
- Introduction to Agriculture II 9-12
- Plant Science I 9-12
- Plant Science II 9-12
- Horticulture I 10-12
- Horticulture II 10-12
- Animal Science I 9-12
- Animal Science II 10-12
- Animal Science III 10-12
- Agriculture Business 11-12
- Comprehensive Ag 11-12
- Natural Resources 9-12
- Agricultural Biotechnology 10-12

Art:

- Ceramics 9-12
- Drawing I 9-12
- Drawing II 9-12
- Fundamentals of Art I 9-12
- Fundamentals of Art II 9-12
- Photography (Technology Course) 9-12
- Graphic Design (Technology Course) 10-12
- Art Portfolio - Traditional 12
- Art Portfolio - Technology 12

Family & Consumer Science:

- Advanced Fashion Design 9-12
- Beginning Foods 9-12
- Fashion Design 9-12
- Interior Design 9-12
- Advanced Foods 10-12
- Child Development 11-12
- Independent Living 11-12

Foreign Language:

- Spanish I 9-12
- Spanish II 10-12
- Spanish III 11-12
- Spanish IV 12

Agricultural Mechanics & Construction:

- Ag Engineering I 9-12
- Ag Engineering II 9-12
- Ag Mechanics I 9-12
- Ag Mechanics II 9-12
- Ag Metal Fabrication I 9-12
- Ag Metal Fabrication II 9-12
- Ag Electricity 9-12
- Ag Construction & Technology 9-12
- Ag Structures I 9-12
- Ag Structures II 10-12
- Ag Drawing I 9-12
- Ag Drawing II 9-12

Business & Information Technology

- Emerging Technology Trends * 10-12
(Technology Credit)
- Introduction to Business 9-12
- Microsoft Office & Keyboarding * 9-12
(Technology credit)
- Principles of Management 9-12
- Principles of Marketing 9-12
- Fundamentals of Web Design* 11-12
(Technology Credit)
- Introduction to Accounting I * 11-12
- Pre-Employment Strategies * 11-12
- Programming and Logic * 11-12
(Technology Credit)
- Information Computing * 10-12
(Technology Credit)
- Internship/Mentorship/Work Experience 11-12

Health:

- Health II 9-12

Music:

- Instrumental Music 9-12
- Vocal Music 9-12

Advanced Placement (AP) Courses: High school courses that can earn college credit upon receiving a passing score on placement exam (check with college of choice about transferability of credit)

- AP Physics
- AP U.S. History
- AP Calculus

Dual Credit Courses*: High school courses that also earn college credit (check with college of choice about transferability of credit)

Offered at Maquoketa Valley:

Business & Information Technology:

- Microsoft Office Basics & Keyboarding
- Introduction to Accounting I
- Information Computing
- Fundamentals of Web Design
- Emerging Technology Trends
- Pre-Employability Strategies
- Programming & Logic

English:

- Composition I
- Composition II
- Introduction to Literature

Financial Literacy:

(Both courses can earn college credit upon receiving a passing score on the final exam. Credit is earned through UNI. Check with the college of choice about transferability of credit.)

- Consumer Math
- Business Finance

Additional dual credit courses are offered through Kirkwood, Jones County Regional Center Kirkwood (Career Academies), and NICC. Some dual credit courses require ALEKS and/or ACCUPLACER testing.

Sample 4-Year Plan with Required Courses:

Year 1 Sample Schedule	
Math:	Algebra 1, Basic Algebra A, or Geometry
English:	English I
Science:	Earth Science
Choose from:	Health 1 Physical Education Spanish I (most 4-year colleges have a foreign language requirement) Electives

Year 2 Sample Schedule	
English:	English II/Speech
Social Studies:	World History
Science:	Biology
Choose from:	Required core credits Math Course Electives (Explore a pathway!)

Year 3 Sample Schedule	
English:	American Literature I & II <u>OR</u> English III
Science:	Physical Science
Social Studies:	U.S. History <u>OR</u> AP U.S. History
Choose from:	Required core credits Electives (Explore a pathway!)

Year 4 Sample Schedule	
English:	Composition I & II <u>OR</u> College Prep English <u>OR</u> Applied English & Communications
Social Studies:	American Government
Choose from:	Required core credits Electives (Explore a pathway!)

Course Descriptions

Six Period Requirement:

- All students are required to take a minimum of six classes each semester.
- Physical Education may not be counted as one of the six subjects.
 - Students must take P.E. each semester they are enrolled at MV, unless they meet one of the exemptions.
 - There is a P.E. excusal form that must be signed by parents and the student.
- Study Hall may not be counted as one of the six subjects.
- Band or Vocal may be counted as one of the six subjects. Students receive one credit for every successful semester completed and the grade received is included when determining students' grade point averages.
- Concurrent credit courses receive one credit for every successful semester completed and the grade received is included when determining the students' grade point average.
- Correspondence courses receive one credit for every successful semester completed and the grade received is included when determining the students' grade point average. Maquoketa Valley students are allowed a maximum of two correspondence courses, pending principal approval.

After Initial registration and scheduling, student schedule changes may only be made according to the following criteria:

1. Approved changes by the teacher.
2. Failure in 1st or 2nd semester course (s).
3. Computer or clerical error. (Master schedule changes)
4. Special education placement.
5. Failure to meet a course prerequisite.
6. Seniors who must enroll in a course to meet graduation requirements.
7. Wanting to add a course without disturbing the rest of the schedule.

Agriculture:

In order for a student to be in FFA, they must be enrolled in 1 semester of an Agricultural Education course per year.

Course Name: Introduction to Agriculture I

Grade: 9 - 12

No. of Semesters: 1

Introduction to Agriculture I introduces students to agricultural opportunities and the pathways of study in agriculture. Students enrolled in Introduction to Agriculture experience hands-on activities, projects, and problems. Student experiences involve the study of communication, leadership, FFA opportunities, and careers within agriculture. Throughout the course are activities to develop and improve employability skills of students through practical applications. Students explore career and post-secondary opportunities in each area of the course. It is recommended that students begin with this course which is offered in the fall only.

Course Name: Introduction to Agriculture II

Grade: 9 - 12

No. of Semesters: 1

No Prerequisite

Introduction to Agriculture II introduces students to agricultural opportunities as well as the agriscience pathways of study within agriculture. Students enrolled in Introduction to Agriculture II experience hands-on activities, projects, and problems. Student experiences involve the science of agriculture, plants, animals, and natural resources. Throughout the course, activities assist in the development of the employability skills of students through practical, hands-on experiences. Students will also explore various careers and post-secondary opportunities in each respective area in the course. There is no prerequisite, though it is recommended that students take this course after Intro to Ag I.

Course Name: Plant Science I

Grade: 9 - 12

No. of Semesters: 1

No Prerequisite

Plant Science I will provide a foundation of plant science knowledge and skills. Students will experience various plant science concepts through exciting "hands-on" activities, projects, and problems. Student experiences will include the study of plant anatomy and physiology, classification, and the fundamentals of production and harvesting. Students will learn how to apply scientific knowledge and skills to use plants effectively for agronomic, forestry, and horticultural industries. Students will discover the value of plant production and its impact on the individual, the local, and the global economy. Students will work on major projects and problems similar to those that plant science specialists, such as horticulturalists, agronomists, greenhouse and nursery managers, and plant research specialists, face in their respective careers. There is no prerequisite for this course, though it is recommended that students complete Intro to Ag I & II before enrolling in this course.

Course Name: Plant Science II

Grade: 10 - 12

No. of Semesters: 1

Prerequisite: Plant Science I

Plant Science II will provide a foundation of plant science knowledge and skills. Students will experience various plant science concepts through exciting "hands-on" activities, projects, and problems. This course provides knowledge about propagation and marketing of plants for food and fiber. Topics covered include climate, tillage and seeding, seed and grain quality, weed and pest management and harvesting and storage practices.

Course Name: Animal Science I

Grade: 9 - 12

No. of Semesters: 1

An in-depth look at the care and management of the major livestock species will be the focus of this course. Housing facilities, behavior, and equipment selection will be included units in this course as well as identification of livestock, reproductive technologies, to round out this course. Students will have the opportunity to hear from guest speakers and take related field trips.

Course Name: Animal Science II

Grade: 10 - 12

No. of Semesters: 1

Prerequisite: Animal Science I

Care and raising animals ranging from pets to domestic livestock will be explored in this course. Students will develop knowledge and skills related to proper nutrition, disease, reproduction, animal systems/anatomy, and general management. Labs and field trips will be used to lend practical experience to this opportunity. Animal nutrition, health, reproduction, facilities, product processing, and farm operations are possible topics covered. Students will study beef, dairy, sheep, swine, horses, fowl and small animals.

<p>Course Name: Animal Science III Grade: 10 - 12 No. of Semesters: 1 Prerequisite: Animal Science II</p> <p>This course is designed to introduce students to the fundamentals of veterinary science. Units included in this course are disease control, reproduction, surgical procedures as well as the history of veterinary medicine. Students will also explore anatomy and physiology of various species. Work-based learning strategies appropriate for this course are school-based enterprises and field trips.</p>	<p>Course Name: Agriculture Business Grade: 11 - 12 No. of Semesters: 1 No Prerequisite Guideline: Intro to Ag.</p> <p>Students will explore business management concepts and forms, including: budgets, balance sheets, checking accounts, credit, income statements, recordkeeping, financial analysis, cash flows, net worth, assets and liabilities and sales. There is not a prerequisite for this course, but is suggested students take Introduction to Agriculture I & II.</p>
<p>Course Name: Horticulture I Grade: 10 - 12 No. of Semesters: 1 Prerequisite: Plant Science I</p> <p>This course is offered in the fall semester. This semester course is designated to present knowledge and skills in the many areas of horticulture. This course will focus on the many sectors of the horticulture industry including home horticulture, landscape design, propagation techniques and greenhouse management. Hands-on experience will include the care, preparation, and sales of greenhouse plants. . There is not a prerequisite for this course, but is suggested students take Introduction to Agriculture I & II as well as Plant Science I and II.</p>	<p>Course Name: Horticulture II Grade: 10 - 12 No. of Semesters: 1</p> <p>This course will focus on all aspects of growing plants and flowers in a greenhouse. Additionally, students will be learning the basics of horticulture and greenhouse production. Students will gain hands-on experience by working in the greenhouse and preparing for the spring plant sale in every aspect including, seed selection, seed starting, design, marketing and promotion, budgeting, and sales.</p>
<p>Course Name: Natural Resources Grade: 9 - 12 No. of Semesters: 1</p> <p>This is a foundation-level course within our program of study. This course provides a variety of experiences in the fields of natural resources and ecology. Students explore hands-on projects and activities while studying topics such as land use, stewardship, and environmental agencies. Study of the natural world including biomes, land, air, energy, use and care as well as a focus on issues surrounding man's interaction with the Earth is addressed in this course.</p>	<p>Course Name: Comprehensive Ag Grade: 11 - 12 No. of Semesters: 1</p> <p>This comprehensive course will cover a wide range of agricultural topics such as ag mechanics, ag construction, food production & marketing, and careers available in the ag industry.</p>
<p>Course Name: Ag Biotechnology Grade: 10 - 12 No. of Semesters: 1</p> <p>This course will explore the impact that biotechnology has in all agricultural applications. A variety of application techniques will be used in both crop production and animal science to provide students with an understanding of these significant technologies and how they are changing the world of agriculture.</p>	

Agricultural Mechanics & Construction:

Course Name: Ag Engineering I

Grade: 9 - 12 No. of Semesters: 1

Prerequisite: None

Ag Power I is to expose students to mechanics, power, technology, and career options in the world of agriculture & engineering. Students participating in the Ag Power I course will have experiences in various mechanical and engineering concepts with exciting hands-on activities, projects, and problems. Student's experiences will involve the study of electricity/energy, tool operation and safety, material properties. Students will acquire the basic skills to operate, repair, engineer, and design agricultural tools and equipment. Throughout the course, students will apply engineering principles to the construction of machines and structures.

Course Name: Ag Engineering II

Grade: 9 - 12 No. of Semesters: 1

Prerequisite: Ag Engineering I

Ag Power II is to continue exposing students to mechanics, power, technology, and career options in the world of agriculture & engineering. Students participating in the Ag Power II course will have experiences in various mechanical and engineering concepts with exciting hands-on activities, projects, and problems. Student's experiences will involve the material properties, machine operation, and structural components. This course will be focusing on engineering concepts and principles and would benefit any students looking at careers in the engineering industry. This course is an advanced course focusing on various engineering practices, and continues from Ag Engineering I.

Course Name: Ag Mechanics I

Grade: 9 - 12 No. of Semesters: 1

Prerequisite: None

Ag Mechanics I is a specialization course designed to provide rigorous applications in the agricultural engineering & mechanics fields. Throughout the course, students apply technical and engineering skills while becoming competent in the processes used to operate, repair, engineer, and design agricultural structures, engines, and equipment. Students practice technical skills including reading prints, troubleshooting machines, a small-gas engine teardown and assembly, reading schematics, researching machine replacement parts, and calculating production efficiencies.

Course Name: Ag Mechanics II

Grade: 9 - 12 No. of Semesters: 1

Prerequisite: Ag Mechanics I

Ag Mechanics II is a specialization-level course designed to provide rigorous applications in the agricultural engineering & mechanics field. Throughout the course, students apply technical and engineering skills while becoming competent in the processes used to operate, repair, engineer, and design agricultural structures, engines, and equipment. Students practice technical skills including reading prints, troubleshooting machines, reading schematics, researching machine replacement parts, and calculating production efficiencies. Students will be disassembling and reassembling an advanced John Deere Gator Engine. This course is an advanced course that continues from Ag Mechanics I.

Course Name: Ag Metal Fabrication I

Grade: 9 - 12 No. of Semesters: 1

Prerequisite: None

Students will study the characteristics of metal and how it is processed into useful products. Tool sharpening, gauge construction, craftsmanship, and repair will be explained and expanded upon so the student will learn additional techniques of separating, welding, and melting metal. The student will practice Arc, MIG, oxygen/acetylene cutting, and plasma arc processes during this course.

Course Name: Ag Metal Fabrication II

Grade: 9 - 12 No. of Semesters: 1

Prerequisite: Ag Metal Fabrication I

Students will expand upon skills obtained through Arc, MIG, oxygen/acetylene cutting, and plasma arc processes. Using MIG welders in out-of-position welds and with different materials are experienced. FORGE use in practicing several skill areas is covered. Students will also complete a CNC Plasma Cutting process. The student will complete a metals project of their choice as a final project in this course.

Course Name: Ag Electricity

Grade: 9 - 12 No. of Semesters: 1

Prerequisite: None

Ag Electricity is a specialized semester long course where students taking this can expect to learn basic house and circuit wiring techniques. This will involve wiring three-way switches, outlets with and without switches, and low voltage circuits. This course will be a great step for any student interested in potential electrician careers.

Course Name: Ag Construction & Technology

Grade: 9 - 12 No. of Semesters: 1

Prerequisite: Ag Structures I

Ag Construction & Technology is a project oriented course requiring the student to build a major woodworking project at his/her expense. Laboratory time will be devoted to project construction. Class time will be spent using technology tools to manage personal schedules, prepare reports and other business communication, and develop skills related to word processing and spreadsheet management. A student in this class needs the fundamentals taught in Ag Structures I (see course description) before taking this class.

<p>Course Name: Ag Structures I Grade: 9 - 12 No. of Semesters: 1 Prerequisite: None</p> <p>Ag Structures I is a course where the student will learn construction fundamentals as they are introduced to a core set of skills necessary in the agricultural construction industry such as: Basic Safety, Construction Math, Use and Care of Hand and Power Tools, Blueprint Reading, Rigging, and Basic Communication and Employability Skills. This introductory course will provide students with a basic background to the agricultural construction industry. Ag Structures One is a project oriented course requiring the student to build a custom "shoe shine" box. Laboratory time will be devoted to project construction.</p>	<p>Course Name: Ag Structures II Grade: 10 - 12 No. of Semesters: 2 Prerequisite: Ag Structures I</p> <p>The Ag Structures II course will give the student the opportunity to build a structure while using the knowledge gained from the classroom including: structural building materials, fasteners, and adhesives; proper use of hand and power tools; floor systems; wall and ceiling framing; roof framing; and window and door construction and installation. The student will learn to use skills to construct made to order livestock buildings, chicken coops, agricultural structures & more.</p>
<p>Course Name: Ag Drawing I Grade: 9 - 12 No. of Semesters: 1 Prerequisite: None</p> <p>Ag Drawing I is the first in the sequence of two drafting courses. This class begins by introducing students to the knowledge and use of Computer Aided Drafting, to learn CAD commands, create multi-view drawings and dimensioning. This course will prepare students for potential engineering and designing careers. It is encouraged for students to take Ag Engineering I & Ag Metal Fabrication I to build upon principles learned in this course.</p>	<p>Course Name: Ag Drawing II Grade: 9 - 12 No. of Semesters: 1 Prerequisite: Ag Drawing I</p> <p>Ag Drawing II is the second course in the drafting sequence. Using CAD Inventor, you will create three-dimensional drawings. The program will then convert the object to a working drawing. This program allows the designer to add color, shading, and texture to have an authentic looking product. This is a class recommended for students interested in Architecture, Engineering, Tool and Die, CNC, or careers where blueprint reading is necessary. Inventor is an Autodesk product that will provide additional educational opportunities above the skills learned in AutoCad. Students taking this course will also create designs that are used on a CNC Plasma Table.</p>

Art:

<p>Course Name: Ceramics Grade: 9 - 12 No. of Semesters: 1</p> <p>Ceramics is an art course designed to introduce students to clay, pottery and sculpting. Students will learn the basics of clay preparation and storage as well as proper use of tools. Discussions of the properties and forming of clay will be included. In addition, construction of basic geometrics in clay will be demonstrated throughout the class. Students will learn to build simple clay projects using a variety of methods including pinch, coil, and slab pottery. Students will also be introduced to the ceramic wheel and pottery. Lastly the students will learn the basics for kiln operations and the glazing process.</p>	<p>Course Name: Photography Grade: 9 - 12 No. of Semesters: 1</p> <p>Students will be introduced to the basic principles of photography and camera usage. Emphasis will be placed on the artistic qualities of photography and photo composition but will also familiarize students with digital cameras and camera options. Students will work with both black and white photography and color as well as design elements. Students will work with digital cameras and Adobe Photoshop.</p>
<p>Course Name: Drawing I Grade: 9 - 12 No. of Semesters: 1</p> <p>Drawing I is an art course designed to introduce students to drawing and drawing materials. Students will learn about techniques in line and composition as well as practice shading techniques while exploring pencil, charcoal, and color. Students will gain knowledge in perspective, shading, light, and shadow. In addition, students will gain experience in observation skills (how to look at objects around us). Use of real life models will be used to develop realism and style.</p>	<p>Course Name: Graphic Design Grade: 10 - 12 No. of Semesters: 1</p> <p>This course emphasizes design elements and principles in the purposeful arrangement of images and text to communicate a message. It will focus on creating art products such as advertisements, product design and identity symbols. Graphic Design may investigate the computer's influence on and role in creating contemporary designs and provide a cultural and historical study of master design works of different periods and styles.</p>

<p>Course Name: Drawing II Grade: 9 - 12 No. of Semesters: 1 Prerequisite: Drawing I</p> <p>Drawing II is an art course designed to build on and strengthen skills and techniques learned in Drawing I. Students are encouraged to explore, specialize, and develop individual drawing skills and interests. Students are asked to validate their artwork with personal connections to their subject. More challenging, real life drawings are stressed through pencil, ink, color ink, charcoal, pastels, and color pencils.</p>	<p>Course Name: Art Portfolio - Technology Grade: 12 No. of Semesters: 1 Prerequisites: Photography & Graphic Design</p> <p>Art Portfolio Technology is an independent work art class for seniors who are college prep and want to develop a more in depth background and portfolio for college. Students will develop a high level of skill in technology based materials, including photography and graphic design. Students will further their knowledge of computer programs including Photoshop, Illustrator and InDesign. Students need to have completed Photography and Graphic Design before registering for Art Portfolio.</p>
<p>Course Name: Fundamentals of Art I Grade: 9 - 12 No. of Semesters: 1</p> <p>Fundamentals of Art I is an art course designed to introduce students to hands on projects through a variety of media's and techniques. Students will create projects that show creativity and knowledge of techniques while learning to use a variety of tools and materials. Students can expect to gain experience in a variety of media including water color painting, oil painting, pencil, charcoal, ceramics, and linoleum block printing.</p>	<p>Course Name: Art Portfolio - Traditional Grade: 12 No. of Semesters: 1 Prerequisites: Ceramics, Drawing I & II, Fundamentals of Art I & II</p> <p>Art Portfolio Traditional is an independent work art class for seniors who are college prep and want to develop a more in depth background and portfolio for college. Students will develop a high level of skill in a variety of art media including crafts (wood, paper, wire, clay, glass), drawing (pencil, charcoal, pastel, ink), and clay (ceramics, pottery, sculpture). Art Portfolio is designed for the self-motivated and self disciplined art student. Students need to have completed all five art classes, not including Photography or Graphic Design to register for Art Portfolio.</p>
<p>Course Name: Fundamentals of Art II Grade: 9 - 12 No. of Semesters: 1 No Prerequisite</p> <p>Fundamentals of Art II is an art course designed to build on skills learned in Fundamentals of Art I. Students will work to further develop and refine painting, design, and drawing skills. Students will gain experience with hands on activities that stimulate the imagination and give them opportunities to become proficient at using a variety of media including acrylic & oil painting, silk screen printing, pencil, and pastels, macramé, and various sculpting media.</p>	

Business & Information Technology:

Course Name: Introduction to Business

Grade: 9 - 12

No. of Semesters: 1

A one semester elective course recommended to students in grades 9-10 that introduces students to the exciting and challenging world of business. This course will increase your preparation to be a knowledgeable consumer, well-prepared employee, and effective citizen in our economy. It will also serve as a background for other business courses taken during high school, prepare you for future employment or business ownership, and make you a better informed citizen for an expanding international economy.

Course Name: Microsoft Office & Keyboarding

Grade: 9 - 12

No. of Semesters: 1

Dual/3 Credit Hrs

Review of proper keyboarding techniques with an emphasis placed on speed and accuracy development. Practical Microsoft applications in producing business forms, presentations, interoffice correspondence, letters, reports, and tables utilizing Word, Excel and PowerPoint to prepare you for daily business activities.

Course Name: Introduction to Accounting I

Grade: 11 - 12

No. of Semesters: 1

Dual/4 Credit Hrs

Requires ALEKS score of 14 or ACT Math score of 16

Introduction to Accounting I is a one-semester course designed for Juniors and seniors. Basic accounting principles are presented to introduce beginning students to fundamental accounting concepts. The accounting cycle of journalizing transactions, posting, adjusting and closing entries, as well as, the preparation of financial statements is emphasized for service and merchandising businesses. The scope and depth of accounting concepts discussed are aimed at non-accounting majors.

Course Name: Information Computing

Grade: 10 - 12

No. of Semesters: 1

Dual/3 Credit Hrs

Recommendation: Microsoft Office Basics & Keyboarding

It is recommended students take Microsoft Office Basics & Keyboarding course before taking this course. A one semester, elective course where students utilize Microsoft Word to edit and create business forms, interoffice correspondence, letters, reports, tables. Using Excel students will create spreadsheets for the business world creating formulas with functions, sorting and filtering information and creating charts to visually make their data easier to understand. Business presentations will be created using PowerPoint. Students will have the opportunity to certify as a Microsoft Office Specialist in Word, PowerPoint, Excel and Access to increase their marketability in the workplace. In the real-world businesses don't use Google sheets or slides, they live in Microsoft productivity tools. Take this course and you will have a competitive edge in the job market.

Course Name: Principles of Management

Grade: 9 - 12

No. of Semesters: 1

Recommendation: Introduction to Business

It is recommended students take Introduction to Business course before taking this course. This semester class is designed for juniors and seniors who are interested in pursuing a business career. Students will learn the techniques and methods used to plan, organize, lead and control a business. The course will include a study of the basic factors in the work environment that affect managerial decision making. Emphasis is placed on the four functions of management as well as a discussion of managerial ethics and social responsibility. If you are thinking about a career in business this is a great course. The project-based learning involves managing a food drive event.

Course Name: Principles of Marketing

Grade: 9 - 12

No. of Semesters: 1

Recommendation: Introduction to Business

It is recommended students take Introduction to Business course before taking this course. This semester class is designed for students who are interested in pursuing a business career. This class covers the broad concept of sports and event marketing including product, distribution, promotion and price decisions. It involves discussion of the role buyers, social issues involved in the marketing process, environmental problems, and the philosophy of marketing management. If you are thinking about a career in marketing or graphic design this is a great course.

Course Name: Programming & Logic

Grade: 11 - 12

No. of Semesters: 1

Dual/3 Credit Hrs

This course emphasizes object-oriented programming & javascript methodology with an emphasis on problem solving and algorithm development. It provides experience and practice in designing and writing a variety of programs to be used by robots and apps. Students experience MIT's App Inventor, Code.org and Scribblor robots. Combine this course with Web Design & Emerging Technology Trends if interested in a Computer Science career.

Course Name: Emerging Technology Trends

Grade: 10 - 12

No. of Semesters: 1

Dual/3 Credit Hrs.

Students work as a team to come up with a business idea and market that idea using digital media. Projects are used as assessments by students demonstrating knowledge of multimedia elements (copyright, video, graphics, sound, animation) creating websites, Youtube commercials, radio ads, on-hold messaging, blogs, and social media ads. This is a great course to take after the Principles of Marketing class.

<p>Course Name: Fundamentals of Web Design Grade: 10 - 12 No. of Semesters: 1 Dual/3 Credit Hrs</p> <p>A one-semester course where students are introduced to the basics of Web page creation and maintenance. Students will learn, read, and write programming languages such as HTML5 and CSS3 along with basic JavaScript to existing webpages. Students learn how to use the Principles of Design to create websites.</p>	<p>Course Name: Pre-Employment Strategies Grade: 11 - 12 No. of Semesters: 1 Dual/3 Credit Hrs</p> <p>Students will learn and practice soft skills, including professionalism, responsibility, time management, workplace communication and develop an understanding of the negative effects of absenteeism and tardiness. Student will learn and complete a job application, create a cover letter, resume with references, a thank you note and will have a LinkedIn page built to start connecting with companies, colleges, and professionals. Students will have mock interviews and take time to do some career exploration. Students may also choose to enter directly into the workforce after successfully completing the course in hand with a professional cover letter and resume that can be used for both scholarship applications and careers.</p>
<p>Course Name: Internship/Mentorship/Work Experience Grade: 11 - 12 No. of Semesters: 1-3 1-2 credits per semester Pre-req: Pre-Employment Strategies with a C- or higher</p> <p>Paid/Unpaid career exploration where the student works 4/8+ hours per week at the worksite. You must provide your own transportation has a cumulative GPA of 2.00 or higher. You will keep a timesheet and complete reflection assignments explaining the hard and/or soft skills utilized on the job.</p>	

<p>English:</p> <hr/>	
<p>Course Name: English I Grade: 9 No. of Semesters: 2</p> <p>Freshman English focuses on central themes including identity and the value of life. Literature studies include a variety of genres (short stories, poetry, dramatic play, novels, videos/movies, songs, and informational reading). Students will develop writing skills through various types of compositions (expository, persuasive, narrative, book reports, and more) and will work on grammar and punctuation.</p>	<p>Course Name: Applied English & Communications Grade: 12 No. of Semesters: 2</p> <p>Applied English and Communications teaches students communication skills – reading, writing, listening, speaking – concentrating on “real-world” applications. This course emphasizes the practical application of communication as a business and professional tool rather than the emphasis of language arts skills as applied to scholarly and literary materials. One unit within the year -- the novel study unit -- will focus on the traditional literature experience where students will practice note-taking and close reading skills in order to take part in literature circles to discuss their novel at an academic level using evidence from the text to support their opinions and viewpoints. Other major units of study that incorporate the Core standards are career exploration, workplace communication skills, and budgeting.</p>
<p>Course Name: English II Grade: 10 No. of Semesters: 1</p> <p>The Sophomore English course is designed to cover a variety of genres. Study of fiction and nonfiction is included. Study from the text will be interspersed with a number of individual units. Along with literature study, students will complete a variety of writing assignments and various other projects. The writing assignments and the taking of essay and objective examinations will improve writing, thinking, and communication skills. In addition, students will read for enjoyment, selecting reading materials that spark their interest.</p>	<p>Course Name: College Prep English Grade: 11 - 12 No. of Semesters: 2</p> <p>College Prep English is designed to familiarize the students with all aspects of communication from writing, reading, speaking, listening, and viewing to researching information. Each unit focuses on a theme related to a struggle: educational, emotional, financial, physical, and civic. Each unit revolves around an anchor text and writing style with college orientation lessons embedded in the activities.</p>

<p>Course Name: Speech Grade: 10 No. of Semesters: 1</p> <p>The purpose of this course is to enable the student to understand and apply speech principles to their lives. The long-term goal is to help students feel comfortable expressing ideas, opinions, and information throughout life. Students will work on speaking, listening, research, and writing skills.</p>	<p>Course Name: Composition I Grade: 11 - 12 No. of Semesters: 1 Dual/3 Credit Hrs Requires ACT English score of 19 or ACCUPLACER WRITERPLACER score of 5 Composition I prepares students for types of communication and thought essential to academic and working world success. The course focuses on writing as a process and is intended to help students identify and refine their own personal writing. Students receive credit through Northeast Iowa Community College in Peosta.</p>
<p>Course Name: American Literature Grade: 11 No. of Semesters: 2</p> <p>This course will focus on various pieces of American literature throughout history. Students will read from multiple text sets which will include short stories, poems, songs, novels, informational reading, videos/movies, pictures and more. These juniors will be challenged to read frequently, take notes in an interactive notebook, and retain understanding of their reading material for purposes of discussion, writing projects, and presentations. This class will focus on skills related to standard English grammar and usage when writing as well as the exploration of careers. In addition, students will read two novels of their choice for enjoyment.</p>	<p>Course Name: Composition II Grade: 12 No. of Semesters: 1 Dual/3 Credit Hrs</p> <p>Composition II provides a continued focus on writing as a process with emphasis on persuasion, evaluation, analysis, investigation, research and documentation of sources. Students may take Composition II after successful completion of Composition I with a C- or better. Students receive credit through Northeast Iowa Community College in Peosta.</p>
<p>Course Name: English III Grade: 11 No. of Semesters: 2</p> <p>Admission into this course is by teacher recommendation only. This course will allow students to work through given material at an individualized pace, with an emphasis on core content delivered through instruction that is catered to meet the needs of each student. Much of this course is similar to American Literature (also a Junior Level course). This course will focus on various pieces of American literature throughout history. Students will read from multiple text sets which will include short stories, poems, songs, novels, informational reading, videos/movies, pictures, and more. These juniors will be challenged to read frequently, take notes in an interactive notebook, and retain understanding of their reading material for purposes of discussion, writing projects, and presentations. This class will focus on skills related to standard English grammar and usage when writing. Students will also explore topics surrounding careers including participation in a career fair. In addition, students will read for enjoyment, selecting reading materials that spark their interest.</p>	<p>Course Name: Introduction to Literature Grade: 12 No. of Semesters: 1 Dual/3 Credit Hrs</p> <p>Introduction to Literature focuses on the craft of narrative literature (short story, poetry, drama) with an emphasis on analysis and response. It includes the study of established as well as recent literary texts. Students receive credit through Northeast Iowa Community College in Peosta. Students are required to take Composition I before this course.</p>
<p>Course Name: Creative Writing Grade: 9 - 12 No. of Semesters: 1</p> <p>Creative Writing will offer students the opportunity to develop and improve techniques and individual style in various genres including, but not limited to, poetry, short story, and memoir. The primary emphasis in class will be on keeping a creative writing journal (online), establishing a routine for writing, and production of a portfolio of creative writing.</p>	<p>Course Name: Creative Writing II Grade: 9 - 12 No. of Semesters: 1 Prerequisite: Creative Writing</p> <p>Creative Writing II will offer students the opportunity to continue to develop and improve techniques and individual style in various topics including, but not limited to, inspiration from music lyrics, fractured fairy tales, writing from artwork, exquisite corpse writing, and other mini writing opportunities. The primary emphasis in class will be on completing daily writing prompts, keeping a creative writing journal, establishing a routine for writing, and production of a portfolio of creative writing.</p>

Course Name: Advanced Speech

Grade: 11 - 12 No. of Semesters: 1

This course is designed to enhance students' speaking and writing skills in the areas of persuasive, informative, and entertaining speaking. Areas of interest will include short film, tv broadcasting, radio broadcasting, original oratory, acting, storytelling, and much more.

Family & Consumer Science:**Course Name: Fashion Design**

Grade: 9 - 12 No. of Semesters: 1

Fashion Design is the first course of a two course sequence. This course is designed to provide students with a general understanding of the clothing and textile industry. Information provided covers basic garment construction, selection and care of various fabrics and textiles, and the elements and principles of design in addition to the creation of different projects. The course includes units on fashion design, careers in the fashion industry and garment construction. Possible construction projects would include: pajama pants, simple tops, pillows, hat and scarf, and simple home decorations, including easy quilts. The use and programming of embroidery machines and heat presses will also be part of this class. Limit 10 students per class

Course Name: Beginning Foods

Grade: 9 - 12 No. of Semesters: 1

Beginning Foods is the first course of a two course sequence. This semester course provides students with an understanding of principles and safety in the kitchen. Other topics include meal planning, food buying, and etiquette. Foods covered are: fruits, vegetables, quick breads and yeast breads and cereal grains. A study of the nutrition of each group is integrated into each topic. Students will learn how to read and interpret a recipe as well as have a basic understanding of nutrition and its importance to the human body throughout life. In addition, students will learn basic cooking principles associated with different foods, be able to accurately measure different types of ingredients, have a basic knowledge of the tools used in cooking and gain knowledge in proper food storage, safety and sanitation procedures. In addition, students will use their technology skills to create an iMovie from the preparation of a recipe of their choosing. Limit of 16 students per class.

Course Name: Advanced Fashion DesignGrade: 9 - 12 No. of Semesters: 1
Prerequisite: Fashion Design

Advanced Fashion Design is the second course of a two course sequence. The students construct a minimum of 4 units throughout the semester, in addition to other sewing requirements. The students learn the basics of pattern reading, interpret pattern instructions and become more confident and independent in garment construction. Possible projects include: dresses, skirts, blouses, dress pants, jackets and home furnishings. Quilting techniques and machine embroidery will also be emphasized in this class. Students must have successfully passed Fashion Design if wishing to take this course, or get permission from the teacher. An emphasis on business, designing of apparel and heat transfers are also part of this sequence. Limit of 10 students per class.

Course Name: Advanced FoodsGrade: 10 - 12 No. of Semesters: 1
Prerequisite: Beginning Foods

Advanced Foods is the second course in a two course sequence. This semester course is a continuation of Beginning Foods. More emphasis is placed on meal management and careers in the food service industry. Topics include: Eggs, pies and pastry, dairy and cheese, poultry, seafood and fish, meat, cakes and cookies, soups, salads and casseroles. A special project will focus on international culture and foods. Students must have successfully passed Beginning Foods if wishing to take this course. Students will create an entire meal as part of a final project. Limit of 16 students per class.

<p>Course Name: Child Development Grade: 11 - 12 No. of Semesters: 1</p> <p>Child Development provides knowledge about the physical, mental, emotional, intellectual and social growth of children. Human growth and development from ages 0 to 6 years will be presented. A HeadStart observation and teaching will be a part of this course. Students will be able to accept, enjoy and be interested in children, be better able to understand the needs of children and the factors which promote their growth and development. They will also learn how children grow emotionally, socially, physically, intellectually and mentally and be able to understand themselves better through studying the growth and development of children. Limit of 20 students per class.</p>	<p>Course Name: Interior Design Grade: 9 - 12 No. of Semesters: 1</p> <p>The primary focus of this course is the interior design of a home. Through design, students begin to understand that interior design is an environment created by the structure, furnishings and surroundings of the home. Students will be able to evaluate the various types of housing available, set up goals for the homes they will eventually establish, be able to furnish and decorate a home using the principles and elements of design, draw and understand basic blueprint symbols and recognize various period homes from American History. Limit of 14 students per semester.</p>
<p>Course Name: Independent Living Grade: 11 - 12 No. of Semesters: 1</p> <p>Independent Living is a course designed to help students prepare for living on their own. The content focuses on areas that they will encounter as they become adults and move on with education, careers and perhaps families. The students will focus on five main content areas: learning to manage, understanding relationships, managing finances, living on your own, and balancing work and family. In addition, they will learn basic clothing repair and care. Life skills needed to be an effective member of a family and society will also be examined. Limit of 20 per class</p>	

Financial Literacy:

<p>Course Name: Business Finance Grade: 11 - 12 No. of Semesters: 1 Test for 3 Credit Hrs @ \$100.00 need a 70 or higher on exam</p> <p>Students have the opportunity to test and earn 3 UNI credits at the end of the course. Units covered include making financial goals, types of savings, financing large purchases, career preparation, funding college, investments and retirement/estate planning.</p>	<p>Course Name: Consumer Math Grade: 11 - 12 No. of Semesters: 1 Test for 3 Credit Hrs @ \$100.00 need a 70 or higher on exam</p> <p>Students have the opportunity to test and earn 3 UNI credits at the end of the course. Units covered include making financial goals, types of savings, financing large purchases, career preparation, funding college, investments and retirement/estate planning.</p>

Foreign Language:

<p>Course Name: Spanish I Grade: 9 - 12 No. of Semesters: 2</p> <p>In this course we will be immersing ourselves in the culture and language of Spanish speaking people around the world. We will be defining our <i>Communication</i> skills, gaining different <i>Cultural</i> perspectives, <i>Comparing</i> the Spanish language and culture to our own, <i>Connecting</i> our world language skills to other subject areas and seeing the strong Hispanic influence even within our own <i>Communities</i>. We will use thematic content in level one such as basic conversation, school, clothing, food, family and sports. We focus on the present tense most of the year and learn the past tense in the fourth quarter. Be prepared to sing, dance, act, converse, and create – all in Spanish! And remember, learning a language is unlike anything you've learned before – so be prepared for some hard, fun work!</p>	<p>Course Name: Spanish II Grade: 10 - 12 No. of Semesters: 2</p> <p>In this course we will be immersing ourselves in the culture and language of Spanish speaking people around the world. We will be refining our <i>Communication</i> skills, gaining more <i>Cultural</i> perspectives, <i>Comparing</i> the Spanish language and culture to our own, <i>Connecting</i> our world language skills to other subject areas. We will expand on thematic content learned in level one such as leisure activities, clothing, shopping, health and movies. Additionally, we will work on talking about the past using Spanish's two past tenses, and finish all major verb tenses, such as Future, Conditional, Present Perfect, and Mandatos. As you may remember from Spanish I, you should be prepared to sing, dance, act, converse, create, work hard and have fun!</p>
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<p>Course Name: Spanish III Grade: 11- 12 No. of Semesters: 2</p> <p>Students in this course expand their ability to communicate in Spanish in a variety of situations. Through a series of theme-based units, students will explore different literary words from the Spanish-speaking world. In this course, students will develop their abilities to understand written and spoken Spanish. They will also expand on their abilities to interact with other students in an informal conversational setting. This course will also prepare students to deliver written and spoken presentations in Spanish regarding what they have read and learned. In Spanish III we put our two years of hard work to use into more real-life application.</p>	<p>Course Name: Spanish IV Grade: 12 No. of Semesters: 2</p> <p>Students develop more sophisticated communication skills in all four areas for listening, speaking, reading and writing with an emphasis on the ability to interact orally and in writing. The <i>authentic</i> reading selections are emphasized at this level. Students communicate using more complex language structures and express abstract ideas with reasonable fluency. Students are able to create and listen with understanding to reports and presentations. They are also able to describe, summarize and discuss selected Upper Levels themes and topics. Each topic addressed in this program has progress indicators defining what students will be able to do. Essential vocabulary and language structures are presented to students within the context of the themes and topics.</p>
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Health:

<p>Course Name: Health I Grade: 9 - 12 No. of Semesters: 1</p> <p>Health I is a comprehensive semester course designed to implement the basic knowledge of health for adolescents. The primary focus of this course helps students examine their lifestyles, select goals, and make plans to achieve and maintain optimum health. Students will develop knowledge, skills and an understanding in the areas of health and wellness, relationships, mental and emotional health, managing stress, body hygiene, male/female reproductive systems, STDs, AIDS, alcohol, tobacco and drugs. It is highly recommended that this course be taken during ninth grade.</p>	<p>Course Name: Health II Grade: 9 - 12 No. of Semesters: 1</p> <p>Health II is a comprehensive semester class designed to extend previous knowledge from Health I for the health and wellness of adolescents. Students will focus on the knowledge, skills and understanding of responsible behavior to maintain optimum health. Students will learn about food and nutrition and how it affects your entire life, managing their weight, eating disorders, food safety, infectious diseases, HIV/AIDS, basic exercising and fitness.</p>
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Mathematics:

<p>Course Name: Basic Algebra A Grade: 9 Number of Semester: 2 Teacher Recommendation</p> <p>This two-semester course generally covers the same topics of Algebra, including solving linear equations, solving linear inequalities, graphing linear functions, writing linear functions, and solving systems of linear equations. A TI-83 Plus or TI-84 Plus graphing calculator is recommended. The color version of TI-84 plus is allowed, but CAS operating systems are not allowed. Admission into this course is by teacher recommendation only.</p>	<p>Course Name: Basic Algebra B Grade: 10 Number of Semester: 2 Teacher Recommendation</p> <p>This two-semester course generally covers the same topics of Algebra, including exponential functions, polynomial equations and factoring, graphing quadratic functions, and solving quadratic equations. A TI-83 Plus or TI-84 Plus graphing calculator is recommended. The color version of TI-84 plus is allowed, but CAS operating systems are not allowed. Admission into this course is by teacher recommendation only.</p>
<p>Course Name: Algebra Grade: 9 -10 Number of Semester: 2</p> <p>This two-semester course teaches concepts that will be used in all other math courses. Topics that will be covered include solving linear equations and inequalities, graphing and writing linear functions, solving systems of linear equations, exponential functions, polynomial equations, factoring, graphing quadratic functions, solving quadratic equations, and radical functions and equations. Assessments include daily written assignments, quizzes, and tests. A TI-83 Plus or TI-84 Plus graphing calculator will be required. The color version of TI-84 plus is allowed, but CAS operating systems are not allowed.</p>	<p>Course Name: Geometry Grade: 9 -11 Number of Semester: 2 Prerequisite: Algebra</p> <p>Geometry is a year-long course that follows Algebra and emphasizes a formal approach to the study of plane geometry. The main topics covered are reasoning and proof, parallel and perpendicular lines, transformations, congruent triangles, relationships with triangles, polygons, similarity, right triangles and trigonometry, circles, circumference, area, and volume. <i>Prerequisite: Must have completed Algebra</i></p>

<p>Course Name: Algebra II Grade: 10-12 Number of Semester: 2 Prerequisite: Geometry</p> <p>Algebra II will develop the students' abilities to solve a variety of equations and use these as models for real-world situations. Specific topics will include: linear functions, quadratic functions, quadratic equations and complex numbers, polynomial functions, rational exponents and radical functions, exponential and logarithmic functions, rational functions, sequence and series, and trigonometric ratios and functions. A TI-83 Plus or TI-84 Plus graphing calculator will be required. <i>Prerequisite: Must have completed Geometry.</i></p>	<p>Course Name: Precalculus Grade: 11-12 Number of Semester: 2 Prerequisite: Algebra II</p> <p>Precalculus is a two-semester course that will <i>extensively</i> integrate statistical, algebraic and trigonometric concepts through work with functions. Students taking precalculus should have successfully completed Algebra, Geometry, and Algebra II. Problem solving will be an integral part of the course utilizing the graphing calculator. Specific topics will include extensive function analysis of the twelve basic functions, as well as polynomial, power, rational, exponential, logistic, and logarithmic functions. We will also spend time studying trigonometry including function analysis and applications. Assessments include daily assignments, quizzes, board work, and tests. A TI-83 Plus or TI-84 Plus graphing calculator will be required and used extensively throughout the course. The color version of TI-84 plus is allowed, but CAS operating systems are not allowed. <i>It should be noted that pre-calculus is an intense, upper-level, time-consuming math course and should be treated as such. Prerequisite: Successful completion of Algebra II.</i></p>
<p>Course Name: Statistics Grade: 11-12 Number of Semester: 1 Prerequisite: Algebra II</p> <p>Statistics is a one-semester course. Concepts which will be covered include visual representations of data, measures of central tendency, variance, standard deviation, analyzing data, transformations of data, z-scores, probability, permutations, combinations, binomial and normal distributions. A TI-83 Plus or TI-84 Plus graphing calculator will be required and used extensively throughout the course. The color version of TI-84 plus is allowed, but CAS operating systems are not allowed. The course will include daily assignments, notes, quizzes, tests and board work. <i>Prerequisite: Must have completed Algebra II.</i></p>	<p>Course Name: AP Calculus Grade: 12 Number of Semester: 2 Prerequisite: PreCalculus</p> <p>Calculus topics presented will include limits and continuity, derivatives and differentiation, and integrals and integration. Concepts discussed will include the chain rule, implicit differentiation, the mean-value theorem, extreme values, concavity, inflection points, the fundamental theorem of calculus, definite and indefinite integrals, integration by substitution, L'Hopital's Rule, and numerous types of functions including but not limited to exponential, logarithmic, and trigonometric. Assessments will include daily work, frequent quizzes, tests, and extensive board work. A TI-83 Plus or TI-84 Plus graphing calculator will be required and used extensively throughout the course. The color version of TI-84 plus is allowed, but CAS operating systems are not allowed. <i>It should be noted that calculus is an intense, upper-level, time-consuming math course and should be treated as such. Prerequisite: Successful completion of Precalculus.</i></p>
<p>Course Name: Applied Math Grade: 12 Number of Semesters: 2</p> <p>Applied Math is a non-algebra review of basic mathematics geared toward the senior student about to enter the job market. Topics that will be covered include gross income, net income, budgeting, checking and savings accounts, purchases, credit cards, loans, vehicle costs, housing costs, and insurance.</p>	

Music:

Course Name: Instrumental Music

Grade: 9 - 12

Number of Semesters: 2

Instrumental Music meets five days a week during the school day. Membership is open to all high school students who have previous experience in the Middle School Instrumental Music program or have completed a period of individual lessons. The main emphasis is concert band with other performance opportunities available. Wildcat Marching Band: The Marching Band is the performing group for the beginning of the fall semester and provides entertainment for the crowd at home football games. In addition, the band will march in the Homecoming parade. All students enrolled in band are considered members of this group and are required to be at all rehearsals and performances. Concert Band: The Concert Band is the performing group, which immediately follows the fall marching season. The band performs three concerts within the school year and non-graduating members will take part in the end of the year commencement ceremonies. In addition, the band competes in various other festivals sponsored in the state. All students enrolled in band are considered members of this group and are required to be at all rehearsals and performances. Pep Band: The Pep Band is comprised of the students in band and will perform at pep rallies and most home basketball games. Instrumental Music also offers the following extra curricular opportunities: Jazz Band: The Jazz Band is a small ensemble which studies and performs jazz music at concerts and in various parts of the community. In addition, the band competes in various other festivals sponsored in the state. Membership is open to all high school band students with the desire to learn about jazz and who qualify for the needs of the Jazz Band. If there is enough interest within the membership of the Concert Band a second Jazz Band will be formed. All students selected for the Jazz Band are required to be at all rehearsals and performances. Pit Orchestra: The Pit Orchestra is a small ensemble that performs with the musical cast for the Fall Musical. Membership is open to all high school students who qualify for the needs of the Pit Orchestra. All students selected for the Pit Orchestra are required to be at all Pit Orchestra rehearsals and performances, as well as full musical rehearsals the week of the performance.

Course Name: Vocal Music

Grade: 9 - 12

Number of Semesters: 2

Vocal Music meets five days a week during the school day. The repertoire studied will be performed in concerts as scheduled throughout the school year. Small ensemble singing and solo work are also available. Students will develop the skills necessary to produce a healthy vocal tone. Students will also develop music reading skills, both melodic and rhythmic and music listening skills. All students will present a Fall Concert, Christmas Concert and Awards Concert and will also participate in State Solo/Ensemble Contest and State Large Group Contest. Vocal Music also offers the following extra curricular opportunities: Vocal Jazz Ensembles: Membership is by audition. These ensembles study and perform vocal jazz arrangements. Students must be able to attend two, 45-60 minute rehearsals a week outside of the school day. These groups often perform on the concert choir concerts. The Vocal Jazz Ensembles attend 2-3 jazz festivals where they clinic with professional musicians and also compete in 2-3 contests throughout the school year.

Physical Education:

Course Name: Physical Education

Grade: 9-12

Number of Semester: 1

The goals of this course are to develop physical fitness, establish an understanding of team/individual sports and promote a healthy lifestyle. Activities include individual and team sports such as; volleyball, football, basketball, soccer, wiffle ball, badminton, table tennis, cooperative games, fitness testing, outdoor games and lifelong activities. Physical conditioning is included. Students will be given a one-half credit each semester they successfully complete Physical Education. A minimum of two semesters of Physical Education is required.

Science:

Course Name: Earth Science

Grade: 9 No. of Semesters: 2

Earth Science offers insight into the environment on earth and the earth's place in space. This course presents the concepts and principles essential to students' understanding of the dynamics and history of the earth. This course will explore geology, astronomy, earth history, climate, and human's influence on the planet.

Course Name: Chemistry

Grade: 11 - 12 No. of Semesters: 2
Prerequisite: Physical Science

Chemistry is a branch of physical science that deals with the study of matter through investigations on how properties of substances determine how they interact, combine, and change to form new substances. Topics in chemistry will be covered through research, lectures, and laboratory activities. Many concepts in Chemistry involve problem solving that requires a strong math background. It is strongly recommended that students have completed one year of Algebra and Geometry, as well as being co-enrolled in Algebra II. Physical Science is a prerequisite for this class.

Course Name: Biology

Grade: 10 No. of Semesters: 2
Prerequisite: Earth Science

This course consists of the study of modern biological concepts aligned with the Next Generation Science Standards (NGSS). Biology is a course that focuses on the study of life through research, lecture, and laboratory activities. Students will need to have successfully completed one year of Earth Science prior to taking Biology.

Course Name: Human Anatomy & Physiology

Grade: 11 - 12 No. of Semesters: 2

Anatomy & Physiology is a course that focuses on the structure and function of the various organ systems, organs, tissues, and cells of the human body. Students will study how the structure (Anatomy) affects the function (Physiology) of the various parts of the human body and will be required to make connections as to why certain disorders and diseases affect the normal functioning of the human body. It is strongly recommended that students have successfully completed Biology and Physical Science prior to taking Anatomy & Physiology. In addition students should have already successfully completed or be currently enrolled in Chemistry.

Course Name: Physical Science

Grade: 10 - 11 No. of Semesters: 2

This course involves the study of the structure of matter and the changes it undergoes as well as energy. The course is broken down into two semesters, chemistry and physics. Chemistry will examine the molecular make-up of matter and Physics will investigate the energy and forces within matter.

Course Name: AP Physics

Grade: 11 - 12 No. of Semesters: 2

AP Physics 1 is an algebra-based, introductory college-level **physics** course. Students cultivate their understanding of **physics** through classroom study, in-class activity, and hands-on, inquiry-based laboratory work as they explore concepts like systems, fields, force interactions, change, conservation, and waves. It is strongly recommended that students have completed advanced algebra and that students are co-enrolled in pre-calculus. Physics students will be asked to carry out higher order math problems and apply the results in a lab format.

Social Studies:

Course Name: World History

Grade: 10 No. of Semesters: 2

The primary focus of the course is learning about world civilizations and their connection(s) to present day. Students will be able to understand our social, legal, economic and political systems of the past and discuss the fundamental ideas of history such as civilization, nationalism, imperialism and colonialism. This course will also focus on the development of historical thinking skills such as analyzing, predicting, summarizing, chronological reasoning, comparing and contextualizing, crafting historical arguments using historical evidence, and interpreting and synthesizing historical narrative.

Course Name: U.S. History

Grade: 11 No. of Semesters: 2

This course provides an overview of the history of the United States, examining time periods from colonialism to the present time. Political, scientific, military, and social developments are typically included in the historical overview. This course will also focus on the development of historical thinking skills (chronological reasoning, comparing and contextualizing, crafting historical arguments using historical evidence, and interpreting and synthesizing historical narrative) and an understanding of content learning objectives. We also hope to instill in every student's mind, the significance and impact each culture has had in helping shape America. With this goal in mind, the teacher should hope to curb social misunderstandings as well as social and cultural racism. We hope to instill in students the developmental skills, attitudes, behaviors, and social tolerance that will enable them to take pride in the United States and in themselves as Americans.

Course Name: A.P. U.S. History

Grade: 11 No. of Semesters: 2

As the College Board defines, AP United States History is a course designed to focus on the development of historical thinking skills (chronological reasoning, comparing and contextualizing, crafting historical arguments using historical evidence, and interpreting and synthesizing historical narrative) and an understanding of content learning objectives organized around seven themes, such as identify, peopling, and America in the world. This course will cover American history from the Pre-Columbian period to the present and will be taught in accordance with the AP U.S. History curriculum framework prepared by the College Board to prepare students for the AP U.S. History exam in May. **NOTE:** Students who opt NOT to take the Advanced Placement United States History Exam will NOT receive AP credit for the course and the course will be changed to American History.

Course Name: American Government

Grade: 12 No. of Semesters: 1

This course provides an overview of the structure and functions of the U.S. government and political institutions, and examines constitutional principles, the concepts of rights and responsibilities, the role of political parties and interest groups, and the importance of civic participation in the democratic process. The structure and function of state and local government is also examined.

Course Name: Character Development & Leadership

Grade Level: 11-12 Number of Semesters 1

The primary objective of this course is to improve the character and leadership skills of students. Students will immerse themselves in the study of 18 commonly valued traits through ethical dilemmas, character movie segments, current events, group discussions, core readings, expository writing, and numerous guest speakers. While the primary goal is to improve character and leadership traits, students will be challenged to improve their reading and writing skills as well as their public speaking and emotional IQ through the use of HOT (higher order thinking) activities. The lesson plans incorporated will reflect various learning styles and give students adaptable ways to learn the subject matter in a meaningful way. Students will be given opportunities to apply the concepts of the course to their personal lives and future goals.

Course Name: The 60's America

Grade Level: 10 - 12 Number of Semester: 1

"Today our concern must be with the future. For the world is changing. The old era is ending. The old ways will not do."
– John F. Kennedy, 1960.

The course traces and documents changes of the 1960s. The period from the election of John F. Kennedy (1960) to the fall of Saigon (1975) remains crucial for an understanding of current issues and attitudes. Those years reshaped American culture and society in many ways. Events and slogans shattered the images of an earlier time and created a new America.

Course Name: Social Issues

Grade Level: 9 - 12 Number of Semester: 1

Social Issues introduces students to a variety of everyday social issues. Course content is designed (but not limited) to look at these issues through a social perspective. It will also work to help students understand the differences in one's behaviors in an individual setting from that of a social setting. This course is designed to be student directed. Much of the context covered will be adapted to current and present day events. A large emphasis is also placed on present day culture and social norms. This course will also focus on the development of critical thinking skills such as analyzing, predicting, summarizing, chronological reasoning, comparing and contextualizing, crafting quality arguments using empirical evidence, and interpreting and synthesizing the social narrative.

Course Name: Street Law

Grade Level: 10 - 12 Number of Semester: 1

Street Law is the concept of educating people about law that is of practical use in everyday life (on the streets). Every purchase, lease, contract, marriage, divorce, crime or traffic violation places the citizen face-to-face with the law. Street Law is designed to provide you with an understanding of your legal rights and responsibilities, knowledge of everyday legal problems, and the ability to analyze, evaluate, and in some situations, resolve legal disputes. Street Law addresses general problems in the areas of criminal, consumer, family, housing and individual rights law. The course also discusses situations such as what to do if you are the victim of crime, when and how to select an attorney, the legal rights and responsibilities of parents and children, how to register to vote, and what to do about discrimination or other violations of your constitutional rights. These and all of the topics covered in Street Law are designed to help you survive on the street.

Special Education:

Course Name: L.S. 9th Language Arts & Reading Grade
Level: 9 Number of Semesters: 2

These two courses are individualized to reinforce student's language arts strengths and remediate their weaknesses in reading and written expression. This course will focus on general skills needed to be successful in the regular education classrooms. Students enrolled in both the language arts and reading sections will receive two credits per semester.

Course Name: 9th Math

Grade Level: 9 Number of Semesters: 2

This course individualizes the student needs in the area of mathematics to reinforce the students' strengths and to remediate their weaknesses. The course focuses on general computation skills and pre-algebra concepts.

Course Name: L.S. 10th Language Arts & Reading Grade
Level: 10 Number of Semesters: 2

These two courses are designed to improve deficit areas in the student's language arts area. Reading comprehension and fluency are emphasized along with a variety of written expressive project and activities. Students enrolled in both the language arts and reading sections will receive two credits per semester.

Course Name: 9th/10th Algebra A

Grade Level: 9/10 Number of Semesters: 2

This two-semester course generally covers the same topics of Algebra, including solving linear equations, solving linear inequalities, graphing linear functions, writing linear functions, and solving systems of linear equations. Admission into this course is by teacher recommendation only.

Course Name: L.S. 11th Language Arts & Reading Grade
Level: 11 Number of Semesters: 2

These two courses are a continuation of the previous language arts and reading courses. Students will continue to work on improving their overall written language and reading skills. Students will earn one credit per semester.

Course Name: 9th/10th General Math

Grade Level: 9/10 Number of Semesters: 2

General Math is a basic math course geared toward independent living skills. Some topics that will be covered include earning money, buying food, shopping for clothes, managing a household, buying and maintaining a car, budgeting, and banking skills.

Course Name: L.S. 12th Language Arts & Reading Grade
Level: 12 Number of Semesters: 2

This course focuses on writing and reading fundamentals that are related to the world of work. Students will earn one credit per semester.

Course Name: L.S. Applied Math

Grade Level: 12 Number of Semesters: 2

Applied Math is a non-algebra review of basic mathematics geared toward the senior student about to enter the job market. Some topics that will be covered include gross income, net income, budgeting, checking and savings accounts, purchases, loans, vehicle costs, and housing costs. Juniors will need special permission from the special education teacher and principal to take this course as a junior.

Course Name: Work Experience

Grade Level: 11 - 12 Number of Semesters: 2

The purpose of this course is for the students to establish an employee-employer relationship in some local business or industry. Students will be placed within the school or in a community work site to explore various job skills. Students will receive one or two credit hours per semester. This course is offered to Level II and Level III students. Freshman and sophomores will need special permission from the work experience coordinator to participate in a work experience.

SCHOOL TO WORK OPPORTUNITIES at MV

1. Job Shadowing:

- Student is entering Junior/Senior year, or is at least 16 years of age.
- Sophomore, Junior and Seniors can sign up for the [Career Learning Link](#) through NICC also.
- If you are a Kirkwood Academy student, sign up for their [Workplace Learning Connection](#). Contact Mrs. Palmer with questions.
- Students 16 years and older can pick up a job shadow application from Mrs. Palmer (outside her classroom). If you plan to move forward to the opportunities listed below, pick up a **reflection, business survey, & thank-you card** from Mrs. Palmer.

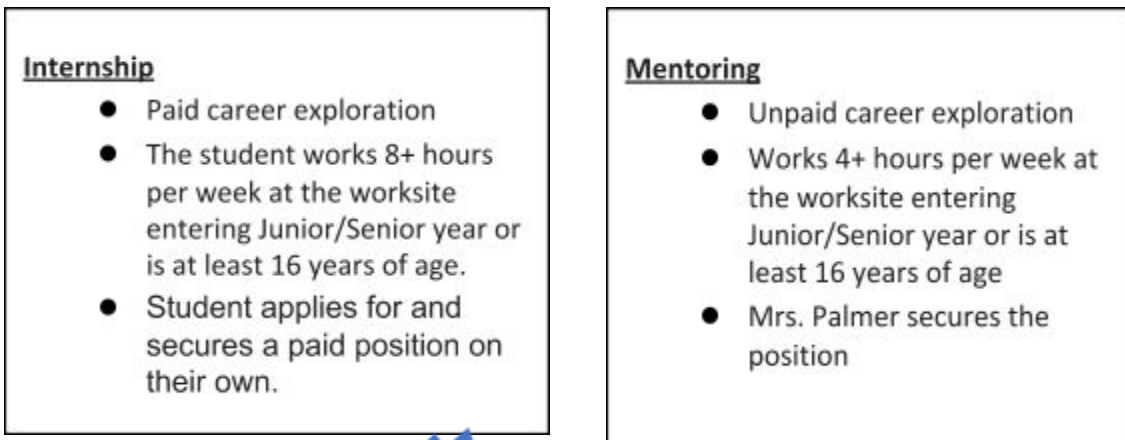

2. PRE-EMPLOYMENT STRATEGIES:

- It is required to complete Pre-Employment Strategies with a grade of "C" or better prior to item 3, working during the school day.

3. WORK DURING THE SCHOOL DAY FOR TWO PERIODS:

- Required to complete Pre-Employment Strategies with a grade of "C" or better.

Choose a path

Internship

- Paid career exploration
- The student works 8+ hours per week at the worksite entering Junior/Senior year or is at least 16 years of age.
- Student applies for and secures a paid position on their own.

Mentoring

- Unpaid career exploration
- Works 4+ hours per week at the worksite entering Junior/Senior year or is at least 16 years of age
- Mrs. Palmer secures the position

- Provides own transportation
- Has a cumulative GPA of 2.00 or higher
- Keeps a time log
- Monthly photo and an explanation of how this relates to Pre-Employment topics discussed in class.
- May complete one semester or the entire school year.
- Receives 1 high school credit per period - Maximum of 2 periods / 2 credits per semester. Can earn up to six credits.
- Takes monthly photos explaining the hard and/or soft skills they are working on
- Grading is 65% Percent Performance Evaluation by Employer; 15% time sheets; 20% Monthly photo/explanation.
- Students **MAY NOT** work for their immediate family member.

Redefining Ready!

Students are more than the number they earn on a standardized test. Our high school strives to provide students with rigorous academic programs, personalized and career-specific learning experiences and social and emotional skills that prepare them to be global citizens in an ever-changing world. The scores on standardized tests are one of many potential indicators that demonstrate readiness for life beyond high school. We are educating students who will leave high school with academic skills that make them college and career ready, with the grit and perseverance to tackle and achieve their goals, and with the mindset that empowers them to approach their future with confidence.

College Ready Indicators:

Students are considered “college ready” if they meet the indicators or the standardized testing benchmarks listed below.

Academic Indicators

GPA 2.8 out of 4.0 **AND one or more** of the following academic indicators:

- Algebra II proficiency (earned A,B, or C)
- Senior year math course/4 years of math (excluding Applied Math)
- CTE pathway course sequence completed
- Dual credit or AP course proficiency (earned A,B, or C)
- AP exam score of 3+
- College Prep course proficiency (including passing Accuplacer exam score)

Standardized Testing Benchmarks

(Minimum score on any one of the following)

- ACT Exam: English (18) /Reading (22) /Science (23)/ Math (22)
- SAT Exam: Math (530)/Reading and Writing (480)
- College Readiness Placement Assessment (determined by post-secondary institution)

Additional Factors:

- Completion of Career Ready indicators (next page)
- Completion of a career pathway
- Completion of tasks related to college admission such as college visits, financial aid application (FAFSA), admission application, scholarship application, etc.
- Development of Maquoketa Valley’s Guidelines for Success

Career Ready Indicators:

Students are considered “career ready” if they have identified a career interest and meet 2 or more of the benchmarks listed below.

Career Cluster identified **AND two or more** of the following benchmarks:

- 90% Attendance
- 25 hours of Community Service/Volunteering
- Workplace Learning Experience/Job Shadow (includes participation in teacher assistant program)
- Completion of coursework for a career pathway
- Participation in two or more organized Co-Curricular/Extra-Curricular Activities:
 - Includes Yearbook, School Newspaper, FFA, Drama/Speech, Band, Choir, Sports
- Development of Maquoketa Valley’s Guidelines for Success

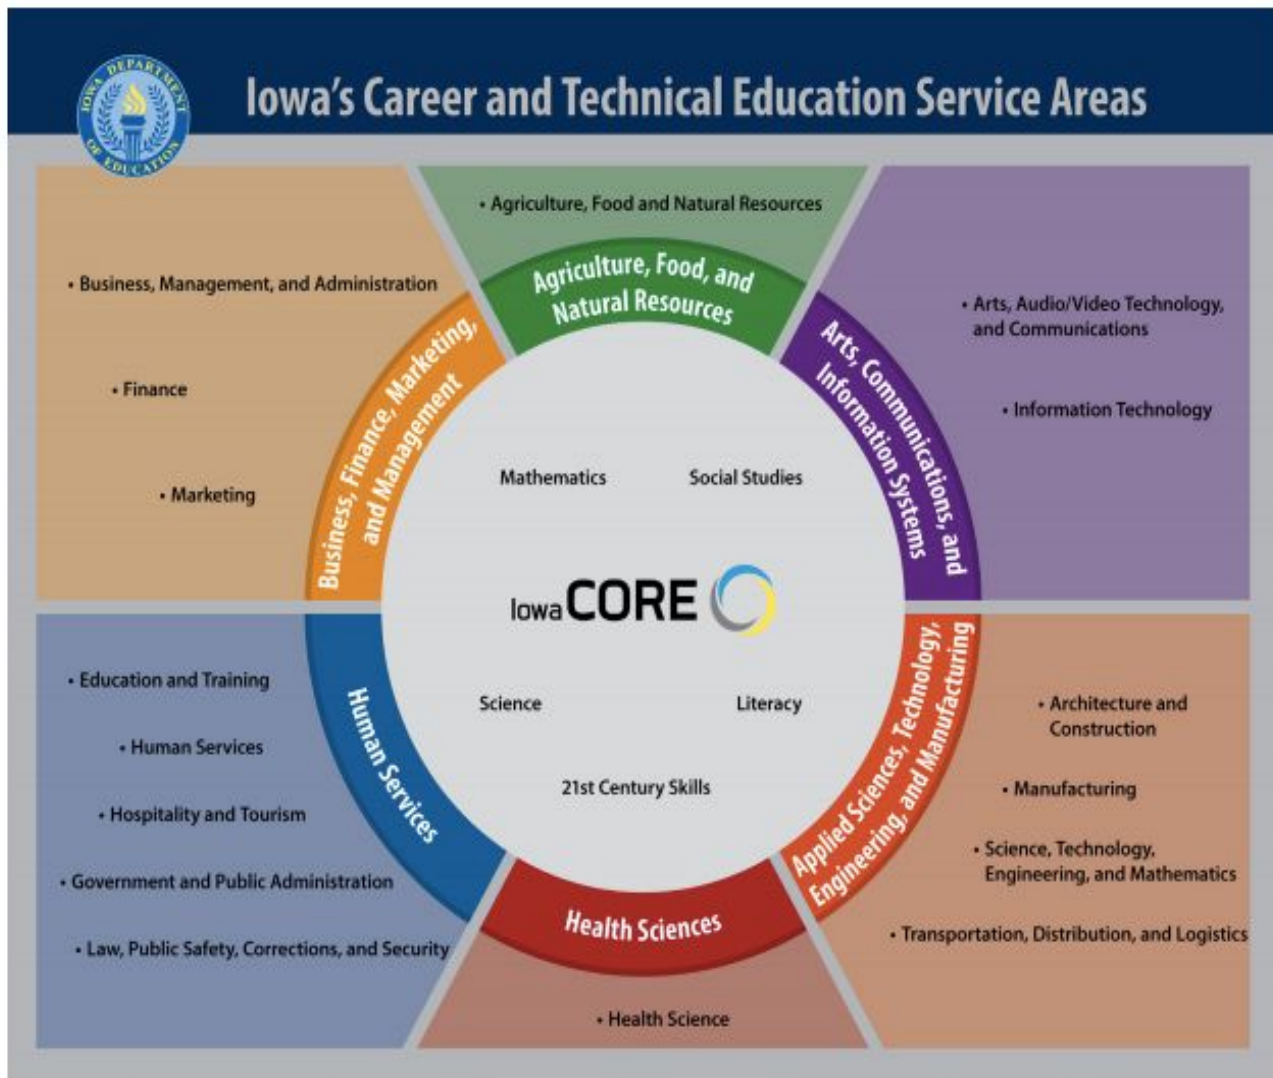

[My Academic Plan](#) (MAP) is an Internet-based career exploration and planning tool used by Maquoketa Valley students. It guides students through a series of steps which allow them to:

- Identify their own interests, work values, and skills through simple online inventories.
- Explore career options which best match interests, work values, and skills.
- Plan high school course schedule with their career goals in mind.
- Explore college majors or training programs which prepare them for their intended career, and then identify a college or training that best fits them.

Additional Information:

- [Military Careers](#) you can take back to civilian life
- Iowa [colleges](#) tuition, and room and board cost
- How much will your [student loan](#) be per month?

There are 16 nationally recognized career clusters. Each contains multiple career pathways.

The goal of career pathways is to assist students in planning their high school course schedule with their career goals in mind. Each pathway provides suggested courses and experiences, lists possible college majors and possible career options. The pathways include links to more information about careers as well as links to colleges' programs of study for various majors. These links are provided to allow students insight on the types of classes required for the major. The links are not endorsements for any particular college. Maquoketa Valley GSD encourages students to explore various colleges' programs to find the best fit.
